

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

*The President's Report of the Account given him by Tho. Burrat, of Kensington, concerning the Earthquake on March 8. last past.*

Read April 26. 1750. **O**N *Tuesday* the 24<sup>th</sup> of this present *April* 1750. Mr. *Thomas Burrat*, of *Kensington*, a Husbandman, and Bailiff to the Right Honourable *Henry Fox* Esq; of *Holland-House*, gave me the following Account :

That, being early about his Business in the Grounds about a Quarter of a Mile from the said House, on *Thursday* the 8<sup>th</sup> Day of *March* last, as he was going to tell his Sheep (which he does every Morning, and which were then lying down on a dry sloping Piece of Ground), he heard, as he thought, about a Quarter after Five a Clock, a Noise, much like Thunder at a Distance; which coming, to his Apprehension, from the North-West, continued some small time, growing louder as it came nearer him, and gave a Crack (so he expressed himself) over his Head; and then went off in the same manner it came on towards the South-East.

He said, that the Sky was, to his thinking, quite clear, and without any Cloud; and that he saw neither Lightning, nor any Appearance of Fire; but that, immediately after the Crack, he found the

S f f f

Ground

Ground to shake under him; and that he even saw it move where he was (tho' as dry and found a Spot as any he knows) like a Quagmire or Quicksand; infomuch that he could not help being apprehensive, that it would have opened, and taken him in.

He says, that the Sheep he was beginning to tell all started up at once, as frightened, and presently began to run, as if pursued by somewhat they were apprehensive of. He said further, that he took notice, that several Crows, which were at Roost upon some Trees not far off, all at the same Instant flew away, making the same Noise they constantly make when they are affrighted at the Discovery of a Bird of Prey, or any other Enemy; and that the Trees themselves very sensibly trembled and shook.

The Noise he heard began a sensible time before the Shake of the Earth; and he judges that the whole Matter lasted better than a Minute.

He first expressed himself about the Direction of the Noise he heard in the Manner just above related; and, being asked again concerning that Particular, he explained himself by saying, that, to his thinking, it came on from between *Hillington* and *Harrow on the Hill*, and went off over *Deptford*: Which may be observed to be very agreeable to his other Description.

Mr. *Bird*, the eminent Mathematical Instrument-maker in the *Strand*, told me also the same Day, that he heard, at his House, a Noise, like the Discharge of a Cannon at some Distance, just before the Earthquake; and that his Bed, in which he then was, was very sensibly rocked from right to left twice: And that he is well assured the Feet of the

Bed were actually lifted up from the Floor, during the Motion; as he was very sensible, by the Noise they made when they came to the Floor again, 4 times in all, twice to his right Hand, and as often to his left Hand.

*Extract of a Letter from Chester, concerning an Earthquake felt there April 2. 1750. communicated by Robert Paul Esq; F. R. S.*

*Read May 3. 1750.* I CAN'T help informing you (as it is a Matter of Concern to every one) that, on *Monday* Night last, about 10 o' Clock, we felt in this City a Shock of an Earthquake. It was sensibly felt by all or most of the Inhabitants. A few Bricks were shook off a Chimney in *Forest-street*; several House-bells were rung; the Centinel at the Castle was shook off his Seat in the Centry-box; the Houses all over the Town were shaken, and the People terribly frighten'd and alarm'd. It has been felt for some Miles round the Town, particularly at *Barn-Hill*, where the Houses were greatly shaken. We are in great Fears of another more violent.
